

Supplying East Coast Australia's energy needs, sustainably and environmentally responsibly

Investor Update

September 2021

ASX:GAS

Disclaimer

Disclaimer

This presentation (Presentation) has been prepared by State Gas Limited (ACN 617 322 488) (State Gas). The Presentation and information contained in it is being provided to shareholders and investors for information purposes only. Shareholders and investors should undertake their own evaluation of this information and otherwise contact their professional advisers in the event they wish to buy or sell shares. To the extent the information contains any projections, State Gas has provided these projections based upon the information that has been provided to State Gas. None of State Gas or its directors, officers or employees make any representations (express or implied) as to the accuracy or otherwise of any information or opinions in the Presentation and (to the maximum extent permitted by law) no liability or responsibility is accepted by such persons.

Summary Information

This Presentation contains summary information about State Gas and its activities current at the date of this Presentation. The information in this Presentation is of general background and does not purport to be complete. It should be read in conjunction with State Gas' other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange which are available at www.asx.com.au.

ASX Releases

Investors are advised that by their nature as visual aids, presentations provide information in a summary form. The key information can be found in State Gas' ASX releases.

Future Performance

This Presentation contains certain "forward looking statements". Forward-looking statements can be identified by the use of forward-looking terminology such as, but not limited to, 'may', 'will', 'expect', 'anticipate', 'estimate', 'would be', 'believe', or 'continue' or the negative or other variations of comparable terminology. These statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected.

State Gas' expectations, beliefs and projections are expressed in good faith and are believed to have a reasonable basis, including without limitation, based on the examination of historical operating trends, data contained in State Gas' records and other data available from third parties. There can be no assurance, however, that these expectations will eventuate. Forward looking statements, opinions and estimates are not guarantees of future performance and investors should not place undue reliance on these forward looking statements.

State Gas' expectations as expressed in this Presentation may be affected by a range of variables which could cause actual results or trends to differ materially, including but not limited to: price fluctuations, actual demand, currency fluctuations, drilling and production results, reserves estimates, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory developments, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates. Such forward looking statements are relevant at the date of this Presentation and State Gas assumes no obligation to update such information.

The material in this presentation has been previously released to the ASX

Highlights

- ↻ East Coast gas shortages
 - ↪ Market signals presenting the opportunity
- ↻ 2-stage long term project
 - ↪ Reid's Dome
 - ↪ Rolleston-West
- ↻ Strategically located
 - ↪ Close to infrastructure networks & Wallumbilla price hub
- ↻ Reid's Dome
 - ↪ A strategic launch pad providing long term infrastructure
- ↻ Rolleston-West:
 - ↪ 2nd phase gas supply – showing exceptional promise
- ↻ Gas supply & marketing optionality:
 - ↪ Surfing the price peaks

East Coast Gas Market Dynamics

Demand:

- Asian LNG demand strong
- Support required for volatile renewables
- Long term requirement for gas for commercial & industrial uses

Supply:

- Bass Strait in long term decline
- Major LNG Projects cancelled /deferred
- Uncertainty around new domestic gas supply

Policy

- Strong Federal & State policy support

Impacts:

- Shortfalls
- High prices
- Volatility

LNG Netback Price

Source: ACCC LNG Netback Price series 16 September 2021 update

Regional Demand will be long term:

Primary energy demand Asia Pacific (Mtoe)

Source: World Energy Outlook 2020, International Energy Agency

Will result in sustained export demand and price pressure

East Coast: Looming Mid-term Supply Shortages

ACCC Forecast Gas Supply and Demand, Southern States

2022 forecast: supply less than demand

Source: ACCC Gas Inquiry July 2021 Interim Report

Longer term forecast: big opportunities for new supplies

Source: ACCC Gas Inquiry January 2021 Interim Report

Seizing the market window...

Target 2023

Reid's Dome a strategic launch pad:

- Conventional & CSG targets
- Confirming the scope
- Permitting Project & export route
- Early development supported by Rolleston-West volumes

Growth to Come

Rolleston-West:

- Exceptional promise from Rougemont drilling
- Extensive area
- Established gas producing formations
- Includes highly prospective conventional gas targets

Synergistic Developments

Two 100% owned adjacent projects
Commercial benefits

- Economies of scale
- Operational optionality

Seizing the market window

Supply Flexibility

Optimised supply

- No domestic gas reservations
- CSG for regular demand
- Conventional gas to meet volatility
- Maximum contracting optionality

“Surf the peak” pricing

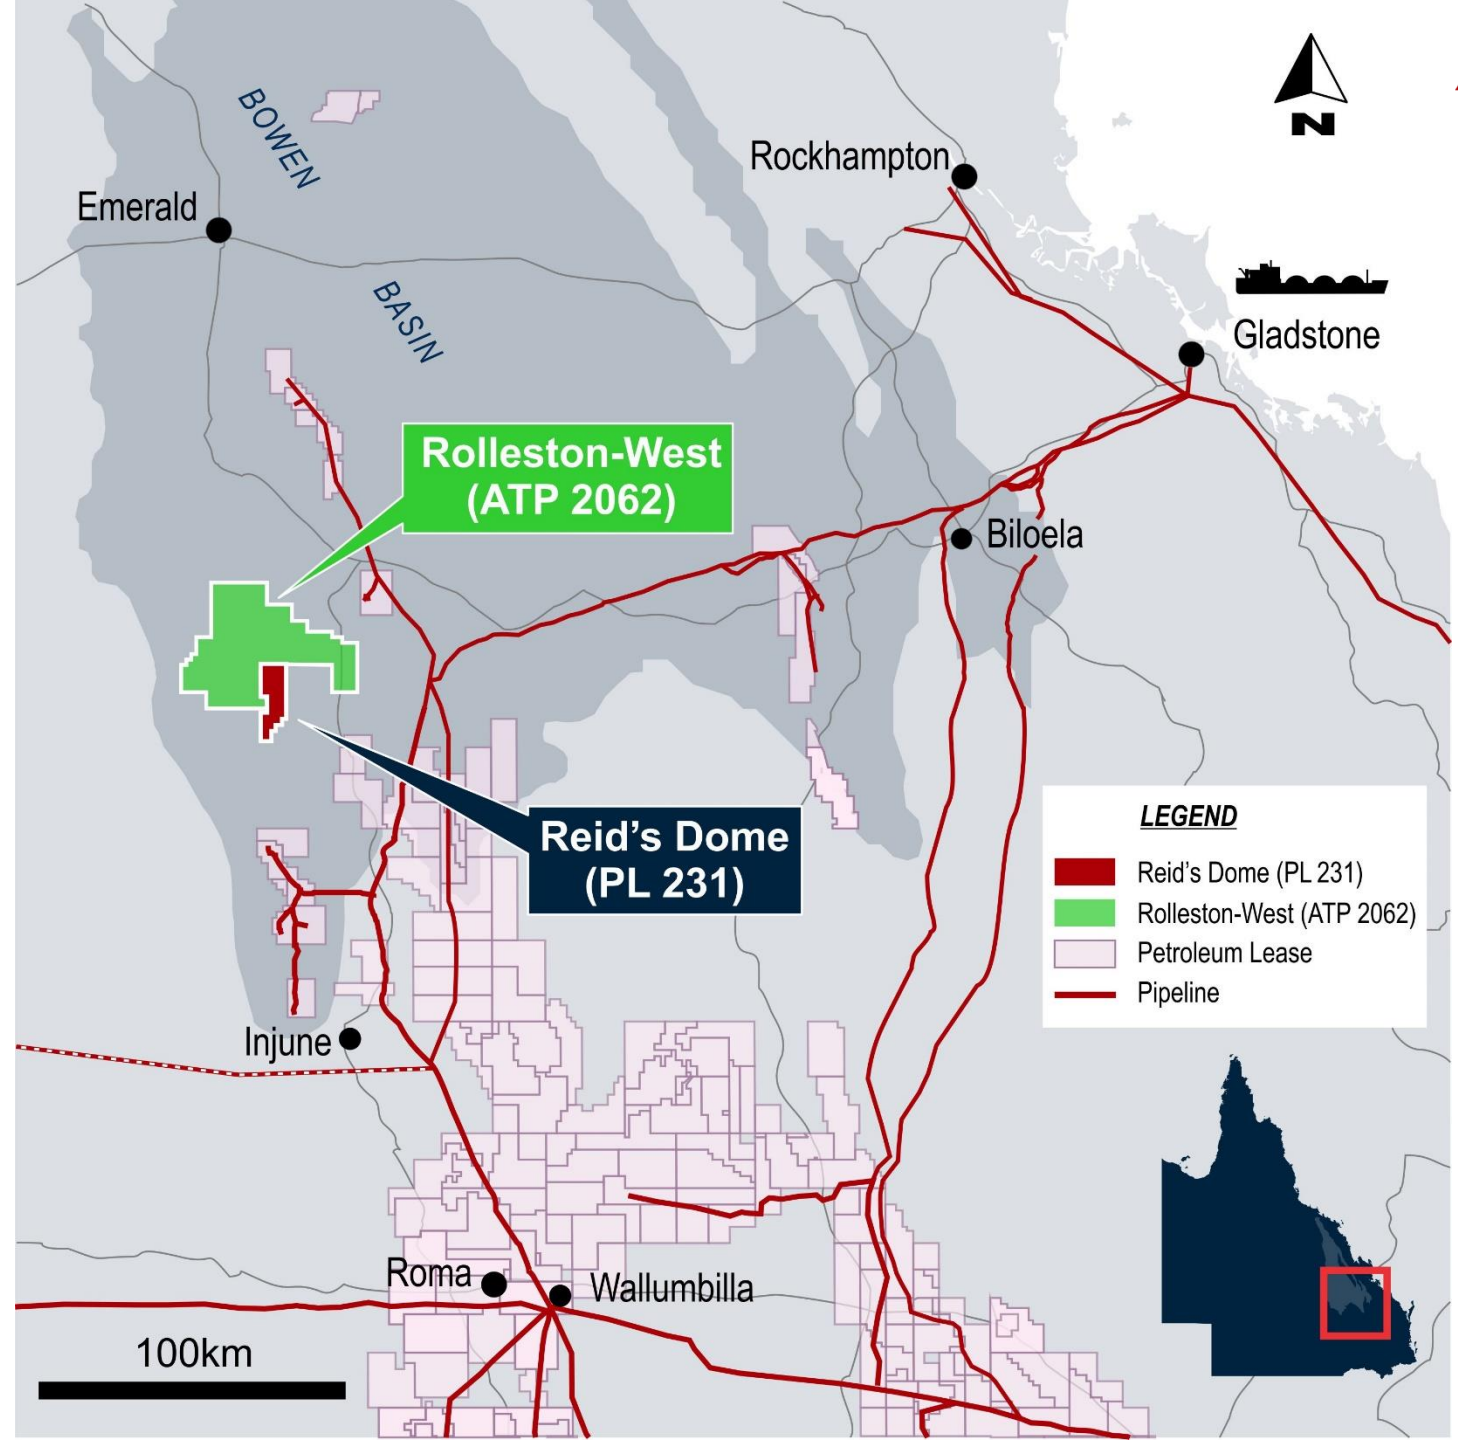

Strategic Location

Location benefits:

- Strategically close to
 - Wallumbilla pricing hub: 200km
 - Gladstone LNG: 290km
- Pipeline infrastructure:
 - Reid's Dome <50km
 - Rolleston-West <30km

Project Areas

- Reid's Dome & Rolleston-West
 - 1594 km² of combined acreage
 - PL 231 – 180 km²
 - ATP 2062 – 1414 km²
 - Highly prospective Bowen Basin sequence
 - Multiple conventional and unconventional targets
 - No domestic gas reservation
- Queensland Gas Pipeline network
 - < 50km Reid's Dome
 - < 30km Rolleston-West
- Single owner (100% State Gas)
- Pipeline Survey Licence held for routes to market

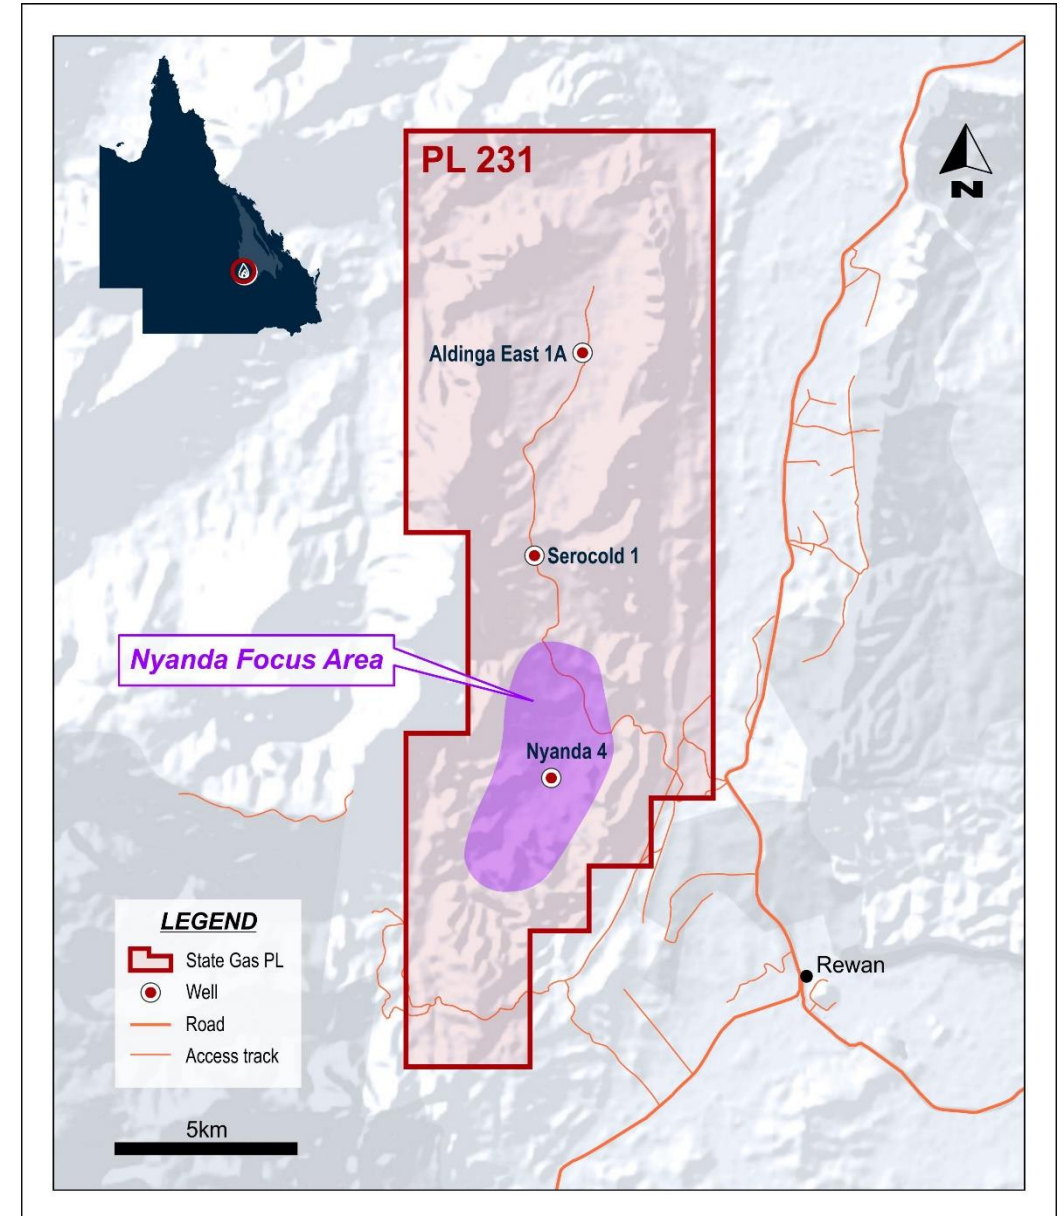

Reid's Dome Project

- Conventional gas (pipeline quality) established in northern province of permit – with additional prospects
- CSG confirmed in Reid's Dome coal measures across length of permit
- Nyanda-4 well in southern province producing at highly commercial rates up to 700,000 cubic feet per day
- Further production enhancements and ongoing tests required to establish project parameters

Estimated Resources Reid's Dome

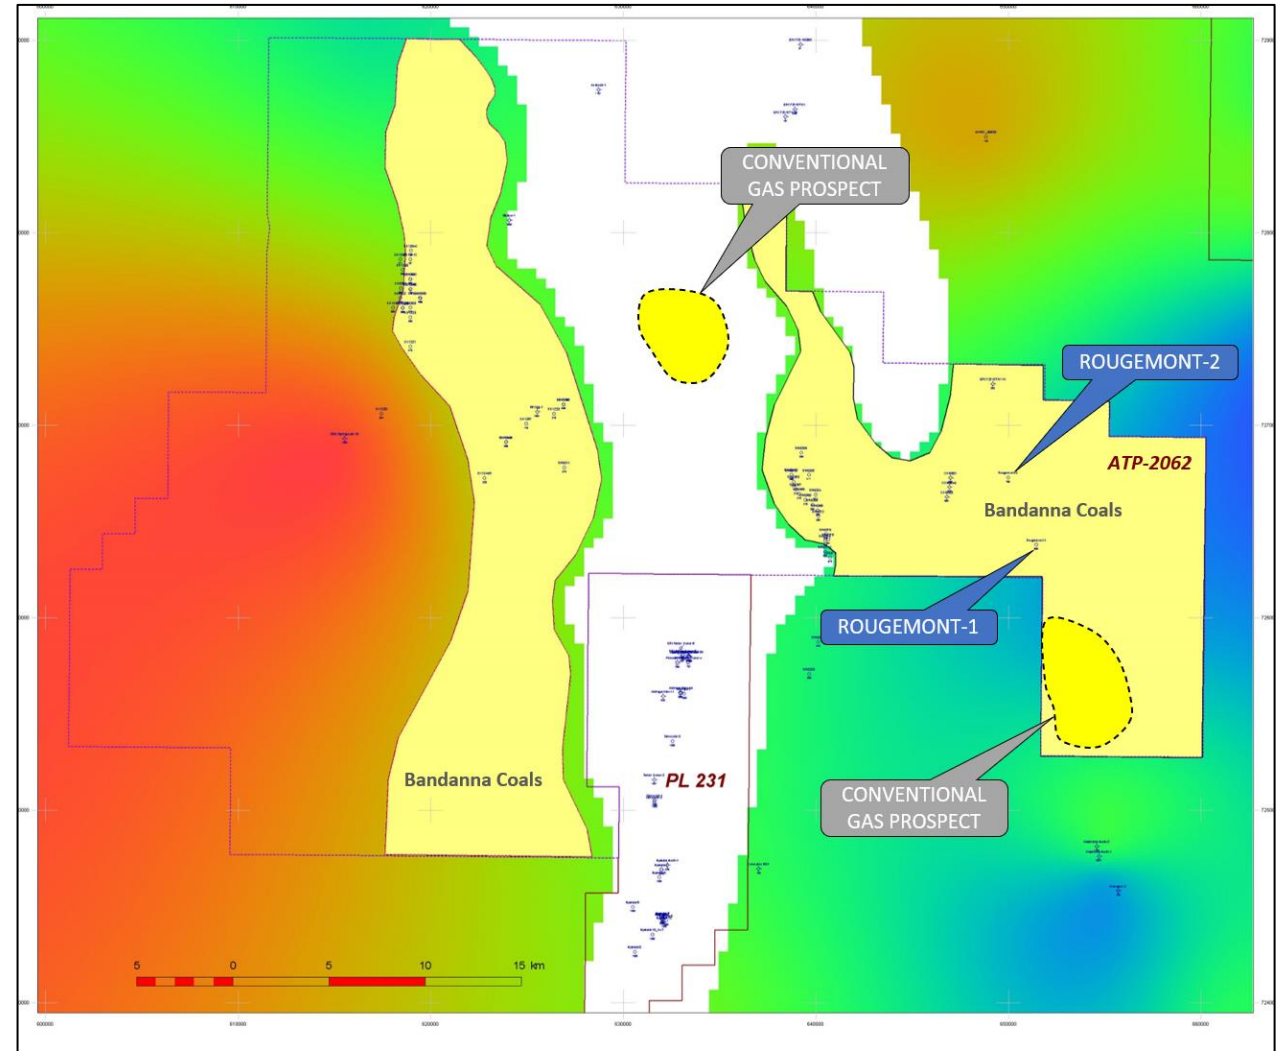

1C	2C	3C
74 PJ	126 PJ	223 PJ

Rolleston-West: Optimising the Future

- ~570 km² Bandanna Formation prospective for CSG
 - Analogous to Arcadia Valley* & Mahalo#
- Drilling of Rougemont 1 & 2 in Q2 2021 established potential of eastern area
 - Continuous coal seams across the area confirmed
 - ~8m coal, with 2 primary seams
 - Gas composition close to pipeline quality
- Plus highly prospective conventional targets:
 - Gas encountered in pre-1992 wells in area
 - New conventional targets at moderate depths

*Arcadia Valley, to the south-east, is a producing field, owned & operated by Santos
Mahalo, to the north-east, is awaiting FID; it is operated by APLNG, owned by APLNG, Santos & Comet Ridge

Rolleston-West CSG + conventional targets

Rolleston-West: East Bandanna Fairway

Exceptional promise at Rougemont-2

Seam	Depth	Thickness	Permeability	Gas content	Composition
1	355.8m	2.8m	25mD	5.15 m ³ /t DAF	>94% CH ₄
2	384m	2.4m	395mD	6.0 m ³ /t DAF	>96% CH ₄

- **Exceptional permeability** resulting in
 - ✓ low cost completions
 - ✓ higher production rates,
 - ✓ more gas drained more quickly
- Shallow coals, enabling low cost drilling
- Gas of pipeline quality after dehydration, enabling low cost processing

Enhanced Economics

East Bandanna Fairway Resources

Estimated Resources East Bandanna Fairway		
1C	2C	3C
53 PJ	91 PJ	161 PJ

Does not include conventional targets or western areas of permit

Supply-Demand & Indicative Timing

ACCC Forecast Gas Supply and Demand, Southern States

Source: ACCC Gas Inquiry January 2021 Interim Report

Upcoming Milestones

➤ Rougemont-2 Production Test

- Mobilisation of completion rig to site
- Down-hole pump & surface equipment installed
- Dewatering commenced
- First Gas

➤ Serocold-1

- Mobilisation of rig & equipment to site
- Anti-sanding solution installed
- Down-hole pump installed & de-watering recommenced
- Gas production re-established

➤ Nyanda-8

- Mobilisation of rig & equipment to site
- Jet-cutting of selected coal seams
- Down-hole pump installed & de-watering recommenced
- Gas production re-established

➤ Resource Certification

"With nearly 400 PJs of geographically blessed 3C Resource in a tight gas market, State Gas' task is to convert that resource into reserves in time to address the upcoming national gas shortage."

Richard Cottee

Executive Chairman State Gas

Appendix – Competent Person Statement

Competent Person Statement and ASX Listing Rules Chapter 5 - Reporting on Oil and Gas Activities

The estimate of Reserves and Contingent Resources for the Reid's Dome and Rougemont Gas Projects provided in this Presentation, is based on, and fairly represents, information and supporting documentation prepared by Mr James Crowley in accordance with Petroleum Resource Management System guidelines.

Mr Crowley is a full-time employee of State Gas, and is a qualified person as defined under the ASX Listing Rule 5.42. Mr Crowley holds a Bachelor of Science (Honours) from Macquarie University, Sydney and has over 35 years' experience in the industry. He is a member of The Petroleum Exploration Society of Australia and The Society of Petroleum Engineers. Mr Crowley has consented to the publication of the Contingent Resource estimates for the Reid's Dome and Rougemont Gas Projects in the form and context in which they appear in this Presentation.

The Contingent Resource estimates for the Reid's Dome and Rougemont Gas Projects, of which State Gas holds 100%, were estimated utilising the probabilistic method and have not been adjusted for commercial risk.
